

Sachin Dhule

Data Analyst | SQL | Power BI | Python | Advanced Excel

Pune, Maharashtra, India | +91-9356991418 | dhules43@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Results-driven Data Analyst with hands-on experience in **SQL**, **Power BI**, **Python**, and **Advanced Excel**, focused on turning raw data into actionable insights that support data-driven decision making. Skilled in **data validation**, **ETL pipeline design**, data modeling, **EDA**, and KPI tracking, with a track record of building interactive dashboards and stakeholder-ready reports. Experienced in **root cause** analysis and cross-functional collaboration across finance, e-commerce, and HR domains.

Technical Skills

Programming & Querying: SQL (PostgreSQL, MySQL, Joins, Subqueries, CTEs, Window Functions), Python (Pandas, NumPy)

Visualization & Analytics: Power BI (DAX, Data Modeling), Tableau, Advanced Excel (Power Query, Pivot Tables, XLOOKUP, Conditional Formatting, Dashboard Design)

Cloud & Data Engineering: Azure SQL Database, Azure Data Factory, Azure Synapse Analytics, Azure Data Lake, Azure Databricks

Version Control: Git, GitHub

Analytics: EDA, ETL, Data Validation, Data Modeling, KPI Reporting, Statistical Analysis, A/B Testing, Hypothesis Testing, Customer Segmentation (RFM, Cohort), Root Cause Analysis, Statistical Analysis, Stakeholder Reporting

Work Experience

Data Analyst Intern

Sep 2025 – Feb 2026

Techonsy Software Pvt. Ltd., Pune

- Engineered **50+** advanced MySQL queries using joins, CTEs, subqueries, and window functions to automate MIS reporting, reducing report preparation time by approximately **40%**.
- Extracted, validated, and analyzed **100K+** customer and B2B transaction records, achieving over **99%** data accuracy through SQL-based validation checks.
- Optimized database performance through indexing, query tuning, and execution plan analysis, improving query response time by approximately **35%**.
- Built automated ETL and data cleaning pipelines, improving data consistency to over **95%** and reducing manual preprocessing effort.
- Designed **10+** interactive Power BI and Excel dashboards tracking **20+ KPIs**, reducing manual reporting effort by approximately **50%** and improving stakeholder visibility.

Project Experience

Bank Credit Risk & Collections Analytics

[Repository](#)

SQL (PostgreSQL), Python (Pandas, NumPy, Matplotlib, Seaborn), Excel

- Analyzed a **30,000-record** credit portfolio using **SQL** and **Python**, applying data cleaning, feature engineering, and exploratory data analysis (**EDA**) to identify key default risk drivers.
- Designed a normalized star-schema database (1 dimension, 3 fact tables) and developed a composite risk-scoring model that segmented customers into four risk grades, revealing a **4x** difference in default rates (**12% vs. 49%**).
- Built SQL-based roll-rate analysis and a dynamic Excel dashboard using **COUNTIFS**, **SUMIFS**, **AVERAGEIFS**, and conditional formatting to support collections prioritization and KPI reporting.

E-Commerce Marketplace Revenue & Retention Intelligence

[Repository](#)

SQL (MySQL), Python (Pandas)

- Built a SQL data validation framework with null checks, referential integrity validation, and range checks to ensure high-quality analysis across approximately **100K** e-commerce orders.
- Performed **RFM (Recency, Frequency, Monetary)** customer segmentation using SQL **window functions** (NTILE), enabling targeted customer retention strategies.
- Conducted an **A/B test** using a two-proportion z-test with a **95%** confidence interval, identifying a statistically significant increase in repeat purchases while highlighting profitability considerations.

HR Analytics: Employee Attrition & Workforce Insights

[Repository](#)

SQL (PostgreSQL/MySQL), Excel, Python (Pandas)

- Cleaned, validated, and transformed a **1,470-employee** HR dataset into an analysis-ready database, expanding from **35** to **46** fields through feature engineering.
- Performed attrition analysis across department, role, overtime, tenure, and compensation, identifying that employees working overtime had nearly three times higher attrition than non-overtime employees.
- Developed a rule-based Retention Risk Score and an interactive Excel dashboard with dynamic filters, KPI cards, and drill-down analysis, identifying a **12x** difference in attrition between high- and low-risk employee segments.

Certification

Data Analytics & Python Certification | Linkcode Technology, Pune

2025

Education

Bachelor of Commerce (B.Com) | Aggregate: 64.33%

2022 – 2025

Tuljaram Chaturchand College of Arts, Science and Commerce, Baramati
